Open Canvas

project : Universal Acceptance Readiness in Uganda

Problem

- Many email and web resources use Application Programming Interfaces (APIs) that are not universally accessible.
- They cannot be used for digital content in local languages.

Solution

- Creating awareness about Universal Acceptance (UA)
- Creating a toolkit
- Build an open repository
- Policy brief

Unique Value Proposition

- APIs to allow characters in other language scripts
- National and organisation policy to encourage UA adoption and use

Key Metrics

- Toolkit
- Increased participation in UA discussions
- APIs use non-latin script

User Profiles
Target audience and early adopters

- Policy makers
- Researchers
- Civil society & activists
- Technologists
- Open data community
- Governments

User Channels

- Existing networks
- Social media
- Project website
- Participants from previous events

Resources Required

- Translation services (language / sign language)
- Design and promotional items
- Participant support

Contributor Profiles
Contribution types and ideal contributors

People interested in UA, funders to support local initiatives, policy makers, researchers

Contributor Channels

- Existing networks
- Social media
- Project website
- Participants from previous events
